

THE TRAILER CAVE

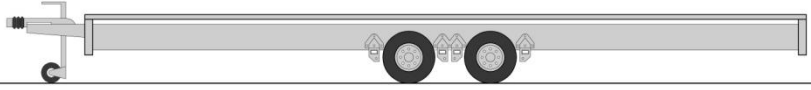

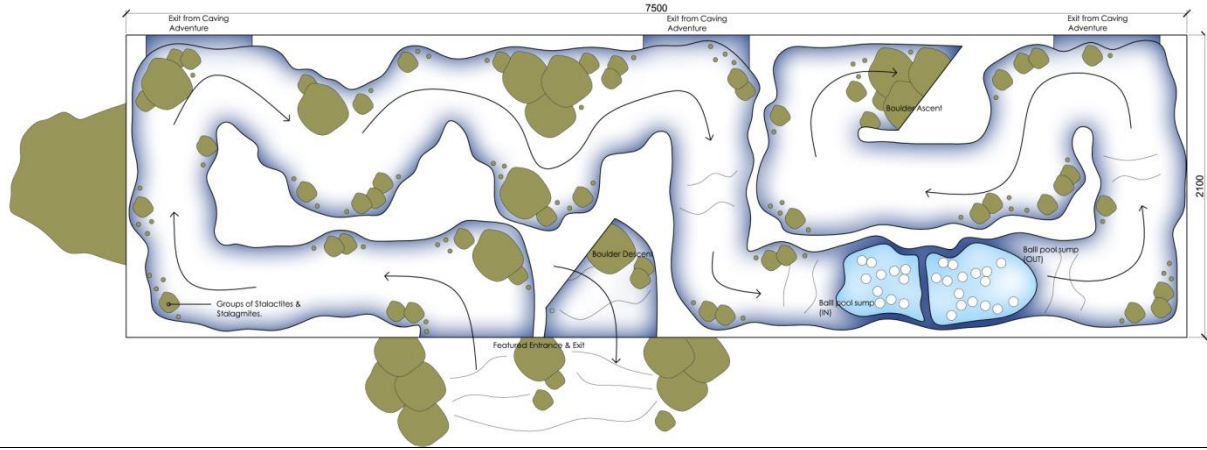

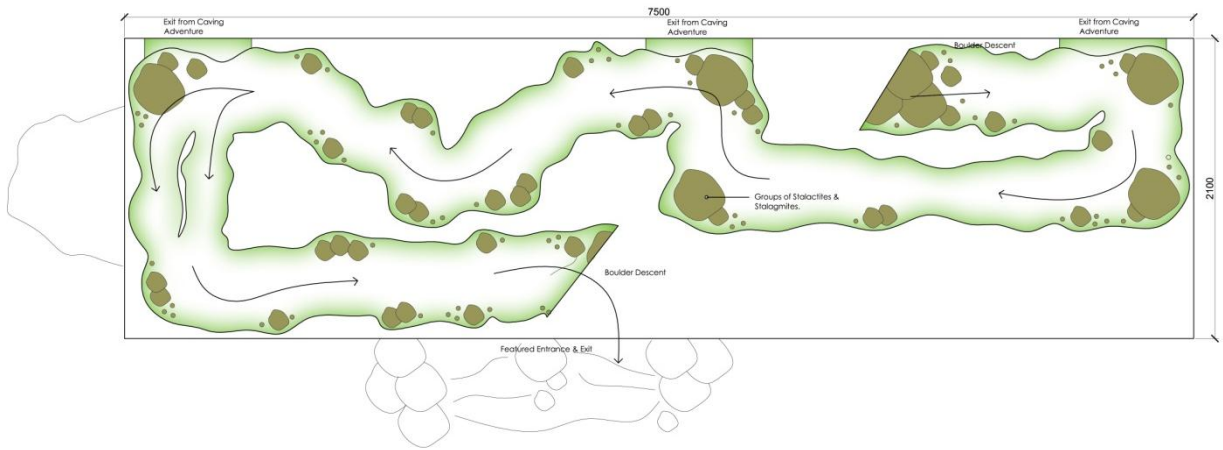

The trailer cave can now be seen in action up and down the country. Built onto a 7 x 2m flat bed trailer and wrapped in a rock effect shell. Whether at a festival, private event or just being pulled down the M1, the trailer cave cannot be ignored.

Built using our bespoke system, the trailer cave contains a ball pool sump, a boulderfield, climbs, descents and a mini chamber.

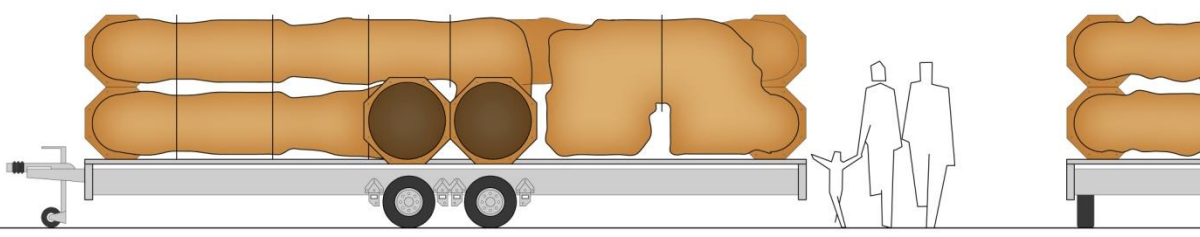

As each trailer cave is custom built we can create shorter and even longer caves, you specify the trailer size and we'll create your adventure!

THE TRAILER CAVE

Stand alone trailer 2.0m x 7.5m long

Trailer and caving system - Ready for transportation

Caving system set up and ready to go
